Software Engineer | Backend Developer (Java)

loganathanek48@gmail.com 

Google Certified IT Automation Professional

[linkedin.com/in/loganathane](https://www.linkedin.com/in/loganathane) 

SUMMARY

Software engineer with 5+ years of experience, starting in automation testing and now working on backend development. Experienced in Java-based services, API integrations, CI/CD pipelines, and deployments across multiple environments. Regularly involved in debugging, production support, and release activities, with a strong focus on backend development using Java and service-based architecture

EDUCATION

Alpha Arts and Science College

BCA Computer Application
2017 – 2020

Institute of Distance Education University Of Madras

MCA Computer Application
2021 – 2023

SKILLS

Languages	Automation & Testing:
Java	Selenium
SQL	Microfocus UFT
	Postman
Backend & APIs	JMeter
REST APIs	UiPath
Maven	Python RPA
Spring Boot	Tools:
	Git
DevOps & Cloud:	Jira
GitLab CI/CD	Rally,
OpenShift	Confluence
AWS (Lambda)	Zephyr
	ALM
Frameworks & Practices:	Databases:
Cucumber (BDD)	Oracle
Data-Driven Testing	PostgreSQL
Keyword-Driven Testing	
Karate Framework	

CERTIFICATIONS

Google IT Automation with Python Professional
Certification from Google

EXTRA-CURRICULARS

Volunteer
Purpose for Life, Tata Consultancy Services

Cadet
National Cadet Corps (NCC)

Department Secretary - Alpha

PROFESSIONAL EXPERIENCE

Software Engineer (Backend Development)

Capgemini [Jun 2024 – Present]

- Worked on backend services using Java, enhancing and modifying existing service logic
- Implemented new functionality by updating service components and REST APIs to support business requirements
- Enhanced Angular-based UI by adding new fields and aligning frontend changes with backend API updates
- Handled API integrations (REST/SOAP) including request/response validation and debugging
- Actively involved in CI/CD pipeline setup and migration using GitLab CI/CD
- Supported deployments in OpenShift and Tomcat environments and debugged production issues using logs
- Worked in enterprise-level banking domain applications

Automation Test Engineer [Aug 2020 – Jun 2024]

Tata Consultancy Services Pvt Ltd

- Developed and maintained automation frameworks using Selenium, Microfocus UFT, and RPA tools
- Automated 2,500+ test cases, improving execution efficiency and reducing testing time by 50%
- Integrated automated test suites into CI/CD pipelines, improving early bug detection and release cycles
- Worked with REST/SOAP APIs for request/response validation and service-level testing
- Developed a Java-based application for account creation workflows, handling input processing and business logic execution
- Performed backend validation using SQL/PLSQL and supported debugging using logs and data analysis

AWARDS & ACHIEVEMENTS

Applause for Team Award

Awarded in appreciation for an integrated release with 30+ identified defects & code fixes, deployed into production with 0 open issues

Beyond Excellence Award

Awarded for automating new functionality to avoid the Mainframe dataset migration from the server and for automating the end to end data flow among 3 assets and for creating and deploying automation frameworks for multiple new scenarios for customer enrollment in Cigna Healthcare.

Service and Commitment Award

Awarded for successfully completed 3 years in the organization
